ClockedIn Software Release Notes – OnTime Version 4.2

Software:	ClockedIn – OnTime Android Application
Current version number:	V4.1.7
Reason for update:	Performance enhancements to the OnTime app for both models – **SmartHub and SmartHub-FT**
Changes made:	- Offline Mode Enhancements - Bug fixing to manage interruption to SSL connection on the OnTime app. - Further offline use cases managed in relation to the Clock In/Clock Out buttons on the OnTime app - ClockIn/Out and Employee Sync API optimisations - Introducing further code enhancements to the FOB functionality and liveness of the FOB scanner. - Resolves a use case related to the FOB scanner where no message is displayed when a FOB is placed against the reader. - Resolves a rare occurrence where the Fingerprint Icon becomes unresponsive on the New/Edit user screen. - UI changes to the background colour of the 'Administrator Access' screen - Ensuring the FOB icon only appears on the home screen and 'Administrator Access' Screen - Optimisation of OnTime Logs for requests/responses to the AirStack server
New version number:	V4.2
Date of release:	31/01/2022

Testing Steps:	All changes in this version have been tested in the ClockedIn Testing environment and no further occurrences have been identified.
Other Impacts:	There are no other impacts to the way the App operates or data that is collected.
Notes:	The App can only be connected to AirStack Version 2.0 or above
Updates:	All Devices including SmartHub and SmartHub-FT using OnTime will need to be upgraded.
