New version number:	V3.0
Date of release:	01/12/2022

Testing Steps:	AirStack has been fully tested; All new features along with original processes have been tested shown to be working in the ClockedIn server environment. Upgraded libraries within AirStack to be further tested by Allocate/RLDatix within the Allocate Cloud environment on the DEV AIR Instance.
Other Impacts:	There are no other impacts to the way the AirStack operates, or how it interacts with HealthRoster. .
Notes:	AirStack V3.0 is recommended to be used alongside OnTime v5.0 or above, however is compatible with OnTime v4.0 or above. AirStack V3.0 will run only on environments using MSSQL 2016 or above. Any instances currently running in MSSQL 2012 environment must be upgraded/migrated to SQL 2016 before AirStack V2.0 can be deployed.
Updates:	Instances of AirStack will need upgrading to V3.0
