New version number:	V4.0
Date of release:	31/05/2023

Testing Steps:	AirStack has been fully tested; All new features along with original processes have been tested shown to be working in the ClockedIn server environment.
Other Impacts:	There are no other impacts to the way the AirStack operates, or how it interacts with HealthRoster.
Notes:	<p>AirStack V4.0 is recommended to be used alongside OnTime v6.0 or above, however is compatible with OnTime v4.0 or above.</p> <p>AirStack V4.0 will run only on environments using MSSQL 2016 or above. Any instances currently running in MSSQL 2012 environment must be upgraded/migrated to SQL 2016 before AirStack V4.0 can be deployed.</p>
Updates:	Instances of AirStack will need upgrading to V4.0
