ClockedIn Software Release Notes – OnTime Mobile (OTM) Version 1.0

Software:	ClockedIn – OnTime Mobile Android/iOS Application
Current version number:	N/A
Reason for update:	Introduction of a new mobile application with Beacon Integration to the ClockedIn product portfolio.
Changes made:	- Clock In/Out via a location using a mobile device. GPS can be used to ensure the User is within a defined radius (GeoZone) using mobile biometrics when available. - Integration of Beacon Terminals which transmit a close proximity range whereby a user can Clock In/Out of a location when in proximity of a Beacon. - View employee Clock In/Out data for the last 30 days - Send AirStack administrator a message
New version number:	V1.0
Date of release:	31/05/2023

Testing Steps:	All changes in this version have been tested in the ClockedIn Testing environment and RLDatix Server environment.
Other Impacts:	There are no other impacts to the way the App operates or data that is collected.
Notes:	OnTime Mobile v1.0 must be used alongside AirStack v4.0 or above.

Updates:	Mobile Users to download the application from the user email sent by an AirStack Administrator.
