ClockedIn Software Release Notes – AirStack Version 5.1

Software:	AirStack
Current version number:	V5.0
Reason for update:	Feature enhancement & Bug fixes
Changes made:	**Improvements**: 1. System Control to allow Fobs to be Registered as Read Only or Read/Write 2. Ability to remove a FOB registered via the 'Employee' page 3. Updated audit text in Audit report to capture whenever an employee Fob is removed. 4. If the system control is changed from Read Only to Read Write, any registered employees FOBs will become unregistered therefore an employee list is show within the Audit report.
New version number:	V5.1
Date of release:	10/06/2024

Testing Steps:	AirStack has been fully tested; All new features along with original processes have been tested shown to be working in the ClockedIn server environment.
Other Impacts:	There are no other impacts to the way the AirStack operates, or how it interacts with Optima.
Notes:	AirStack V5.1 is compatible with OnTime v4.0 and above however should be used alongside OnTime v7.0 and above. In order to upgrade to AirStack v5.1, your Optima platform must be v11.3.2 and above.

Updates:	Instances of AirStack will need upgrading to AirStack v5.1
