ClockedIn Software Release Notes – AirStack Version 5.2

Software:	AirStack
Current version number:	V5.1
Reason for update:	Feature enhancement & Bug fixes
Changes made:	**Improvements**: 1. All Device list screen - text search filter and the data is now sorted in alphabetical order based on Organization field. 2. All Device list screen - sorting when selecting the following columns: (Id, Location, IMEI, Organisation, Postcode, Unique Identifier, Type Status) 3. Time Sheet Report - 'Location' text field set within CPAir, not the address.
New version number:	V5.2
Date of release:	06/08/2024

Testing Steps:	AirStack has been fully tested; All new features along with original processes have been tested shown to be working in the ClockedIn server environment.
Other Impacts:	There are no other impacts to the way the AirStack operates, or how it interacts with Optima.
Notes:	AirStack V5.2 is compatible with OnTime v4.0 and above however should be used alongside OnTime v7.0 and above. In order to upgrade to AirStack v5.2, your Optima platform must be v11.3.2 and above.
Updates:	Instances of AirStack will need upgrading to AirStack v5.1
